Edgar Cayce

THE SLEEPING PROPHET

Considered by many to be the
Greatest Psychic of the 20th century!

Edgar Cayce was born on March 18, 1877 in Hopkinsville. It was here as a young man, that he developed his remarkable talents as a clairvoyant. Due to his readings on health, he is considered by many to be the Father of Holistic Medicine.

From 1901, when he was 24, until his death in 1945, he gave over 14,000 "readings." Mr. Cayce gave readings while in a self-induced trance. Lying down, he would close his eyes, loosen his collar and shoes, and enter into a place of altered consciousness. A conductor directed questions to Mr. Cayce, and he answered them by tapping into what was believed to be a universal knowledge. A stenographer recorded and later typed the words spoken through him during these readings. The readings cover such a wide array of subject matter that they were indexed under more than 10,000 major subject headings, with more than 225,000 index cards.

Most of the readings were given for individuals and, therefore, deal with specific personal questions concerning various aspects of physical, mental, spiritual, vocational and interpersonal life. Some of these readings, however, were complete discourses on topics such as meditation, Bible interpretation, and world affairs. It was not necessary for the person obtaining the reading to be present: Mr. Cayce was able to describe individuals and diagnose their physical condition with surprising accuracy, even though they might have been hundreds of miles away. From these readings, thousands of people reported being helped, often in ways that transformed their lives. Studied as a whole, the readings provide specific procedures, which many consider helpful in treating many illnesses. And now, decades after Mr. Cayce's death, his readings continue to inspire, educate and amaze those who research them.

Take the Edgar Cayce Cell Phone Tour while visiting Hopkinsville! The Edgar Cayce Cell Phone Tour brochure can be found at the Museums of Hopkinsville or VisitHopkinsville.com

With thousands of reading pertaining to more than 10,000 subjects, the topics of Edgar Cayce's sessions are vast. Here is a sampling of his "*Universal Knowledge*"

But above all, let the mind be of constructive influence, ever. Be not only good, but good FOR something. In each contact, in each activity every day, make those acquaintances, those activities, BETTER by thy association with same!

See in others the good. Do not deny or try to cover up those things that are of a detrimental or an evil influence; just encourage in self and in others the good - and the good for a purposefulness. *Reading 2448-1*

For, none may tell another how to be *beautiful*. It must be the reflection of that entertained in the heart and mind of the individual. And as He is beauty, He is friendship, He is love, the more and the nearer individuals reflect that in their conversation, in their dealings with their fellow man, the greater the glory to Him. *Reading 2574-1*

Helping others is the best way to rid yourself of your own troubles. *Reading 5081-1*

Edgar Cayce's advice to a couple planning to marry, in 1935: Remember each, **love is giving**; it is a growth. It may be cultivated or it may be seared. That of selflessness on the part of each is necessary. Remember, the union of body, mind and spirit in such as marriage should ever be not for the desire of self but as ONE. Love grows; love endures; love forgiveth; love understands; love keeps those things rather as opportunities that to others would become hardships.

Then, do not sit STILL and expect the other to do all the giving, nor all the forgiving; but make it rather as the unison and the purpose of each to be that which is a COMPLEMENT one to the other, ever. *Reading 939-1*

As to the building supply for the system through the **diets**, we would cling rather to that which makes for the reduction of acidity; the building of the white AND red blood supply, through a consistent activity towards nerve-building foods and values... Hence, there should be a reduction in sugars- only taking those sugars from fruits and vegetables; with the fats that would be from nuts, preferably. Use rather almonds and filberts than black walnuts, English walnuts or even Brazilian nuts, though these will be helpful at times, but very small amounts of same. *Reading 787-1*
